Akash-Shanmugavadivel

Computer Science graduate internship experience building cloud governance, backend services. Proficient in Java, Spring Boot, Python, REST APIs, AWS, MongoDB. Passionate about scalable backend systems, cloud engineering, and AI applications.

Education

Madras Institute of Technology, Anna University, Chennai **2022 - 2026**
B.E. Computer Science and Engineering CGPA: 8.1/10

Experience

CoreStack - Professional Services Intern Feb 2026 – Present
Python, Flask, REST APIs, MongoDB, AWS, Azure, GCP, Terraform, Cloud Governance, FinOps

- Developed cloud governance scanner rules using Terraform to validate infrastructure configurations and identify policy violations.
- Developed Python automation that generated cloud right-sizing recommendations for Amazon RDS and OpenSearch, reducing manual analysis effort and improving optimization workflows.v
- Contributed to AI observability initiatives by implementing multi-cloud cost tracking and reporting for AI prompt consumption across AWS, Azure, and GCP.
- Generated and maintained weekly GreenOps reports for AWS and Azure environments to monitor cloud efficiency and sustainability metrics.

Technical Experience

Learning & Debugging Assistant for Python - Chatbot (with RAG)
Python, Streamlit, LangChain, LLMs, Azure OpenAI

- Built an AI-powered programming Chatbot using Retrieval-Augmented Generation to assist learners with Python debugging
- Implemented contextual code analysis and dynamic hint generation, reducing debugging time by 40%
- Processed multi-format learning content (PDFs, PPTX, YouTube transcripts)

MIT Canteen - Product Management API
Java, Spring Boot, Spring Data JPA, Postman

- Built RESTful APIs supporting full CRUD operations with input validation and layered architecture.
- Utilised Spring Data JPA for database interaction and standardised HTTP responses
- Deployed scalable API solution with proper documentation using Swagger

Skills

Programming Languages: Java, Python, SQL, C
Backend Technologies: Spring Boot, Spring Data JPA, REST APIs, JDBC, Hibernate, JWT Authentication
Frameworks & Libraries: Flask, LangChain, boto3, JUnit, Mockito
Databases: PostgreSQL, MySQL, MongoDB
Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure
Cloud & DevOps: Linux, Terraform, GitHub Actions, Cloud Governance, FinOps
Tools: Git, Maven, Swagger (OpenAPI), Postman
Core Concepts: Object-Oriented Programming (OOP), DBMS, Data Structures Algorithms, Debugging

Achievements

- Solved 500+ problems in Data Structures, Algorithms, and SQL on LeetCode and GeeksforGeeks.
- Earned the LeetCode 100 Days Badge (2025).
- Achieved Top 50 SQL Badge on LeetCode.

Certifications

Spring Boot for Beginners *Udemy, 2025*
MongoDB with Java Spring Boot *Udemy, 2026*
AWS Beginners *Udemy, 2026*
